Designing is one of the most complex challenges for any jeweler. Designing with someone else's ideas is even more difficult. One must consider cost, wearability, weight, and in the case of clients selling their pieces, the ability to sell something with ease. 3d allows us to explore different ideas keeping cost for our clients at a minimum. Every challenge is unique.

For eklektic jewelry studio, 3design has been an invaluable tool that has allow us to take our clients concepts and create jewelry from them. We have created jewelry from sketches, pictures, ideas, poems and in one time from a plastic protection cap of a bottle of whiskey.

Below:

Humming bird from client's sketch. Birds have a hidden bail and pin system. All birds are numbered and signed.

Client's sketch

3d rendering

Milled wax

White gold blue diams.

Yellow gold white diams.

Hidden bail and pin system.
